

Etienne Lescot

Technical leadership · Product engineering · Generative AI · B2B SaaS

etiennelescot@gmail.com · +33 6 80 51 21 20 · France · github.com/EtienneLescot · linkedin.com/in/etienne-lescot-69402019

PROFILE

15+ years building SaaS products as a founder, CTO and engineer. Led a 10-person R&D team, including hiring, then co-founded two companies as CTO. Full-time open-source maintainer since 2025: tools for coding agents, used daily from scoping to code review.

SELECTED HIGHLIGHTS

4K+ stars created across open-source projects	40K-star repo as OpenScreen collaborator	#1 Trending GitHub developer · all languages
---	--	--

Peak GitHub Trending: developer #1 daily and #13 weekly across all languages · #11 monthly in TypeScript · n8n-as-code #18 daily TypeScript repository.

CORE EXPERTISE

Leadership & delivery	Hiring and team leadership, engineering standards, architecture decisions, code review, CI/CD and releases on cloud SaaS (AWS, Kubernetes)
AI systems	Coding agents in daily use, agent orchestration, tool calling, MCP, RAG and vector search, automated evaluation, cost and latency tradeoffs
Product engineering	TypeScript, Node.js, Python, React, API and CLI design, testing, observability, multi-package releases

OPEN-SOURCE ENGINEERING

Open-source maintainer Full-time product development, contributor review, documentation and release security	2025–present
--	--------------

n8n-as-code

Creator & maintainer

github.com/EtienneLescot/n8n-as-code

- Code-first workspace (CLI, VS Code extension, MCP server) for writing and syncing n8n workflows as TypeScript, backed by offline node schemas.
- Multi-provider evaluation harness measuring workflow correctness, token use and tool calls on reproducible scenarios.
- Parameter hallucinations traced to the schema extractor, not the prompt: exposing the typed structure in context removed a hand-maintained table.
- Reach:** 1.5K+ GitHub stars, 180+ forks and 11.5K+ VS Code Marketplace installs.

Stack: TypeScript, Node.js, MCP, LangChain, VS Code Extension API

OpenScreen

Core contributor & maintainer · Cross-platform screen recorder and editor

github.com/getopenscreen/openscreen

- Second-largest contributor to the original 40K-star repository; now leads its approved continuation (2.6K+ stars), releases and contributor review.
- Rebuilt GPU export across D3D11, Metal and Vulkan (roughly 10 to 126 fps on a low-end iGPU); shipped Linux support, offline captions and Microsoft Store distribution.

Stack: TypeScript, React, Electron, Rust, PixiJS

ENTREPRENEURIAL & PRODUCT LEADERSHIP

Saraé

2024–2025

Co-founder & CTO · Architecture & services

- Defined the product and technical roadmap for a customer platform combining conversational AI, call analysis and journey automation.
- Took RAG and LLM integration to production on AWS, with Bedrock serving the phone switchboard under real-time latency; multi-instance architecture, CI/CD and infrastructure costs.

Exalgo

2022–2023

Co-founder & CTO · AI SaaS

- Co-founded a cloud-native conversational AI product and defined its technology, product roadmap and service architecture.
- Built the chatbot and RAG foundation with Python, LangChain and LLM APIs; led Kubernetes, ArgoCD and Scaleway delivery across multiple environments.

Leni

2019–2022

CTO · Event technology & IoT

- Led a 10-person R&D team, including hiring, and owned the roadmap, architecture and delivery of the AppKiosk and Youslide SaaS portfolio.
- Turned AppKiosk from a custom-project model into an industrialized no-code platform, reducing production costs by **90%** and supporting **100+ events** with up to **50,000 users per event**.
- Directed product, cloud architecture, UX and multi-client monitoring for web, mobile and physical-kiosk deployments, including Printemps Haussmann with JCDecaux.

Independent Development Studio

2007–2019

Founder · Product engineering & delivery

- Led web and mobile products from discovery through delivery for healthcare, luxury, events and services organizations.
- Co-designed and delivered DigitecPharma, a B2B2C healthcare platform serving an ecosystem of **1,000 pharmacies**, **30+ groups** and **300K patients**.
- Owned architecture, UX, client relationships, teams, budgets and delivery across PHP, React, Angular, Node.js, mobile, AWS and Docker.

COMMUNITY, EDUCATION & LANGUAGES

Speaking & community · Guest on The n8n Masterclass, n8n's official podcast · contributor review and documentation on two open-source projects · a public workflow with 65,000 views

BTS Logistics · ESPL, Angers · 2005

Continuous technical learning · Software engineering, cloud, AI and SaaS architecture · 2007–present
